

# Exercise

Suppose in an AOA diagram, the duration of Task A is 7 days, and its early start date is the 15th day. Task A has two successors, which are Task B and Task C. The early start dates of Task B and Task C are 27th and 30th day, respectively. The late start dates of Task B and Task C are the 28th day and the 33th day, respectively. Please calculate the free float and total float of Task A.
